FILLING LINE UPGRADE, HARVEY FRESH

CLIENT: TETRA PAK
LOCATION: WA
YEAR: 2011

FOOD PRODUCTION SPECIALISTS

In 2011, Tetra Pak engaged TFG Group to assist with the upgrade of a filling line at the Harvey Fresh flavoured milk production facility in Western Australia's South West. TFG completed the installation using orbital welding techniques to ensure the highest quality finish and bacterial contamination.

QUALITY ASSURANCE

Due to the potential contamination in milk products, the highest level of aseptic, food grade orbital welding techniques were employed to guarantee the quality of the end product.
