INSTALLATIONS FOR THE FOOD
& BEVERAGE INDUSTRY

BREWING

MATILDA BAY BREWERY, HEALESVILLE

CLIENT: CARLTON & UNITED
BREWERIES
LOCATION: VIC
YEAR: 2019-2020

ICONIC BRAND

TFG Group started our mechanical installation brewing journey way back in '96 with Matilda Bay Brewing Company in Fremantle, Western Australia. We are still a part of this iconic brand, with Carlton & United Breweries Matilda Bay Brewery in Victoria's pristine Yarra Valley.

MECHANICAL INSTALLATION

TFG have successfully installed a small batch brewery in Healesville, Victoria, with CUB and Australia's original craft brewer Phil Sexton. The 20 hectolitre brewhouse consists of a malt handling system, three brew vessels, a mash/lauter tun, kettle and whirlpool, six fermenters, two bright beer tanks, a CIP system, keg line, centrifuge and beer cooler. TFG also scoped and supplied the electrical works and integrated with the existing utilities/services.

TURNKEY PROJECT

After a complete internal renovation of the old Giant Steps cellar, CUB, Phil and his team reveal a modern brewery making about 300,000 litres of beer a year, using clean 'mountain water' from the Yarra Valley. TFG are very proud to be a part of this turnkey project, the amazing stories it holds and to work with such passionate individuals.
