WATER

STAINLESS STEEL SOLUTIONS FOR WATER CORPORATION PROJECTS

PIT COVERS

DM CIVIL, ARMADALE PUMP STATION

TFG Group fabricated and supplied pit covers, safety grates and a stainless steel cast in frame complete with an aluminium cover. All stainless steel items were completely seal welded and passivated as per Water Corporation specifications. Items were inspected by Water Corporation welding inspectors and dispatched with a Water Corporation release form.

SAFETY GRATES & ALUMINIUM LIDS

GEORGIU GROUP, KARRATHA WASTE WATER

TREATMENT PLANT 10

TFG fabricated and supplied safety grate cast in frames, complete with gasket seal, all hinge pins and accessory items.

TFG also supplied aluminium pit covers. Items were completed within the given timeframe to meet the client's deadline and were inspected by Water Corporation weld inspectors prior to dispatch. All items met the client's requirements and specifications.

INLET SPECIALS

WATER CORPORATION

TFG fabricated and supplied multitudes of sizes and quantities, directly to Water Corporation central works. Items were inspected and dispatched to site for Water Corporation contractors to install.

PIPE SPOOLING

WATER CORPORATION, ARMAGH STREET PUMP STATION

TFG fabricated and supplied multiple pipe spools direct to Water Corporation to be used as emergency storage upgrades at the Armagh Street Pump Station. These pipe spools were fabricated using stainless steel 316 materials and were welded to the Australian Standard 4041.
